Contents of volume 147

Regular articles

Early phase collagen synthesis in lungs of rats exposed to bleomycin
Changes in collagen types I and III were measured
B.E. Van Hoozen, K.L. Grimmer, G.P. Marelich, L.C. Armstrong, J.A. Last (USA) 1–13

Gonadotropin-releasing hormone (GnRH) partially reverses the inhibitory effect of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin on ovulation in the immature gonadotropin-treated rat
TCDD may have effects on both the ovary and the hypothalamic/pituitary axis
X. Gao, B.K. Petroff, K.K. Rozman, P.F. Terranova (USA, Germany). 15–22

Simultaneous administration of diethylphthalate and ethyl alcohol and its toxicity in male Sprague–Dawley rats
V. Sonde, A. D'souza, R. Tarapore, L. Pereira, M.P. Khare, P. Sinkar, S. Krishnan, C.V. Rao (India) . . . 23–31

Kinetic analysis of the toxicological effect of tacrine (Cognex®) on human retinal acetylcholinesterase activity
A.S. Alhomida, A.A. Al-Rajhi, M.A. Kamal, A.A. Al-Jafari (Saudi Arabia) 33–39

Implications of oxidative stress and inflammatory process in the cytotoxicity of capsaicin in human endothelial cells: lack of DNA strand breakage
F. Richeux, M. Cascante, R. Ennamany, D. Sanchez, A. Sanni, D. Saboureau, E.E. Creppy (France, Spain, Benin). 41–49

Suppression of autophagy by ethionine administration in male rat liver in vivo
Possible mechanisms are discussed
T. Ohshita (Japan) 51–57

In vitro aberrant gene expression as the indicator of lead-induced neurotoxicity in U-373MG cells
M.-Y. Liu, W.-C. Hsieh, B.-C. Yang (Taiwan) 59–64

News and Views 65

Hypomethylation as a cause of homocysteine-induced cell damage in human cell lines
B. Hultberg, A. Andersson, A. Isaksson (Sweden) 69–75

Cytotoxic effects of cantharidin on the growth of normal and carcinoma cells
C.-C. Wang, C.-H. Wu, K.-J. Hsieh, K.-Y. Yen, L.-L. Yang (Taiwan) 77–87

A possible role of oxidative stress in the vanadium-induced cytotoxicity in the MC3T3E1 osteoblast and UMR106 osteosarcoma cell lines
Non-transformed cells are more sensitive than the osteosarcoma cell line
A.M. Cortizo, L. Bruzzone, S. Molinuevo, S.B. Etcheverry (Argentina). 89–99

The role of anion exchange in the uptake of Pb by human erythrocytes and Madin-Darby canine kidney cells
Anion exchange accounts for uptake of lead into erythrocytes, but not kidney cells
D.I. Bannon, L. Olivi, J. Bressler (USA). 101–107

Potential health effects of drinking water disinfection by-products using quantitative structure toxicity relationship
The calculated structure – toxicity relationships might help to set priorities when no data from in vivo bioassays are available
C.J. Moudgal, J.C. Lipscomb, R.M. Bruce (USA) 109–131

Comparison of respiratory responses to *Metarhizium anisopliae* extract using two different sensitization protocols
Intratracheal challenge produces greater sensitization than intraperitoneal administration of the antigen
M.D.W. Ward, S.L. Madison, D.L. Andrews, D.M. Sailstad, S.H. Gavett, M.J.K. Selgrade (USA) 133–146

News and Views
Predictive Methods for Food Allergenicity: Perspectives and Current Status
I. Kimber, K.I. Atherton, J.G. Kenna, R.J. Dearman 147–150
Chelation of aluminium by combining DFO and L1 in rats
M. Blanuša, L. Prester, V.M. Varnai, D. Pavlović, K. Kostial, M.M. Jones, P.K. Singh (Croatia, USA) . . 151–156
Chronic combined exposure to cadmium and arsenic exacerbates nephrotoxicity, particularly in metallothionein-I/II null mice
Increased oxidative stress may be the putative mechanism of action
J. Liu, Y. Liu, S.M. Habeebu, M.P. Waalkes, C.D. Klaassen (USA) 157–166
Endotoxin pretreatment protects against the hepatotoxicity of acetaminophen and carbon tetrachloride: role of cytochrome P450 suppression
Protection is possibly afforded through release of cytokines such as IL-1α
J. Liu, L.E. Sendelbach, A. Parkinson, C.D. Klaassen (USA) 167–176
UDS induction by an array of standard carcinogens in human and rodent hepatocytes: effect of cryopreservation
L. Schehrer, J.D. Regan, J. Westendorf (Germany). 177–191
Comparative evaluation of the combined osteolathyritic effects of two nitrile combinations on *Xenopus* embryos
The data suggest that the two nitriles induce osteolathyrism by a different mechanism
D.A. Dawson, M.A. Cotter, D.L. Policz, D.A. Stoffer, J.P. Nichols, G. Pöch (USA, Austria). 193–207
Increased airway responsiveness after skin sensitisation to 3-carene, studied in isolated guinea pig lungs
L. Låstbom, A. Boman, P. Camner, A. Ryrfeldt (Sweden) 209–214
Suppressed oxidant-induced apoptosis in cadmium adapted alveolar epithelial cells and its potential involvement in cadmium carcinogenesis
A possible mechanism
J.D. Eneman, R.J. Potts, M. Osier, G.S. Shukla, C.H. Lee, J.-F. Chiu, B.A. Hart (USA) 215–228
